

The Adjustable Gratnells System

How it works

Construction

The Gratnells Tray Storage System is based on the patented slotting of square tube to take nylon coated **adjustable** steel tray runners and steel shelf clips. Frames are constructed of 1" sturdy 18 gauge square steel tube with slots at 1" intervals.

The patented *lug*, when bent upwards, prevents the runner being accidentally dislodged.

Patented slots for adjustable tray runners and shelf clips.

Full width runner support for tray.

Gratnells Trays

The material used to make the trays has been chosen for quality and safety. For quality the trays are made from 20% talc filled Polypropylene giving strength and rigidity. For safety Polypropylene is chemically resistant to the majority of chemicals used in schools and semi fire-retardant at 0.87" per min. There is also an anti-static additive in the Polypropylene to reduce the attraction of dust.
